CHILLED BEAM IQ STAR NOVA II

TECHNICAL CATALOGUE

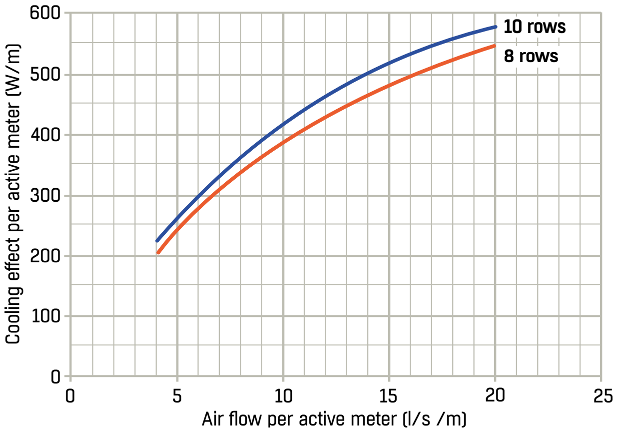
IQ STAR NOVA II CHILLED BEAM

The NOVA II chilled beam is an active chilled beam system for ventilation, cooling and heating. This diffusion system offers comfort and flexibility thanks to the Flow Pattern Control combined with adjustable induction.

The Pi advanced function gives even more flexibility adding a Demand Controlled Ventilation function to the system. The air diffusion follows building occupancy and makes the HVAC system highly efficient.

NOVA II with Pi function is pressure independent and makes the system suitable for many duct work system types.

QUICK SELECTION



The diagram shows the total cooling effect per active metre at a total pressure of 70 Pa, water flow q_w = 0.05 l/s , temperature difference between room air and supply air Δt = 8 °C and temperature difference between mean water temperature and room temperature Δt = 8 °C.

KEY FEATURES

- Ventilation
- Water Heating and cooling
- Adjustable induction
- Flow Pattern Control
- In option: Demand Controlled Ventilation, Pressure independent, Lighting and Controls

SPECIFICATIONS

- An active chilled beam for exposed installation
- Ensures comfort with low temperature gradient and no draught - FPC + EC
- Gives flexibility to the diffusion enabling lay out modification -FPC + EC
- Has in option a Demand Controlled Ventilation function, available as retrofit, independent from system pressure - Pi
- Available in two different executions: rectangular shape and rounded shape
- Includes fastening brackets for rapid and simple installation
- Openable front plate in one piece (Swing down)

PRODUCT CODE EXAMPLE

Exposed chilled beam IQFI-180-11-07-1

CONSTRUCTION AND FUNCTIONS

CONSTRUCTION

This chilled beam is available in 120 cm, 150 cm, 180 cm, 210 cm, 240 cm, 270 cm, 300 cm and 330 cm standard lengths, is designed for exposed installation.

NOVA II is available in two different design; round and rectangular corners. The standard air connection on NOVA II is $Ø_{Air}$=125 mm.

MATERIAL AND SURFACE FINISH

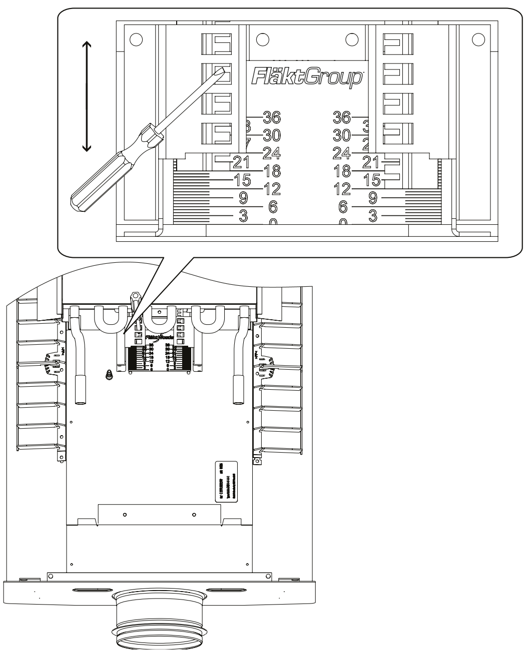
The chilled beam casing is mainly made of galvanized steel sheet. The front plate is powder coated standard RAL 9003 white, 30% gloss which corresponds to NCS 0500-N. Heat exchanger coil made of aluminium fins mechanically bonded to copper pipes with $Ø_{out}$ = 15 mm end connections and 1.6 MPa maximum working pressure.

FUNCTIONS

This chilled beam is designed for flexibility with a number of features optional to the basic standard model. Electric heating, Pi Function, Flow Pattern Control (FPC air deflector), Lighting, control and regulation equipment are the additional features available.

Energy Control (Standard)

Airflow for the chilled beam is easily adjustable with the patented Energy Control comprising variable nozzle settings mounted on rails that can be set for symmetrical or asymmetrical throw by adjustment of the nozzle in alignment with indicator on each side. 36 nozzle positions are available providing a wide choice of airflow settings for immediate and future requirements. Nozzle adjustment requires only a screwdriver to push the rails forward or backward to the desired position as shown below.



PI FUNCTION (OPTION)

For Demand Controlled Ventilation operation, the Pi Function accessory must be mounted on the chilled beam. Thanks to this function, an actuator will then change automatically the nozzle position in order to change primary airflow.

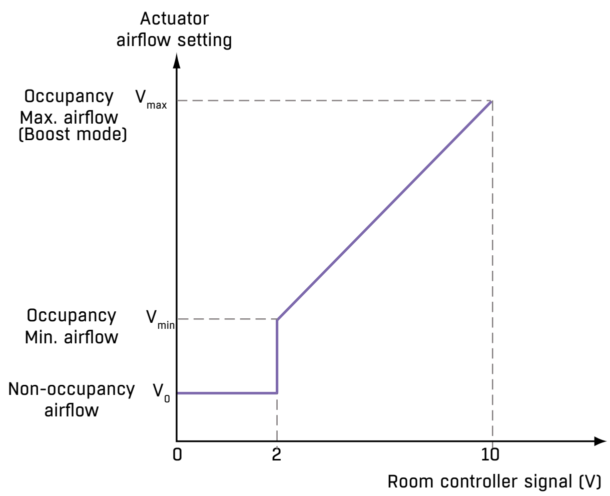
The chilled beam system will be able to follow different operation sequences depending on the controller chosen. It is possible to set different airflows according to occupancy level or to manage air quality thanks to a CO_2 sensor connected to the controller. Three parameters can be set in the actuator : V0 for non-occupancy, Vmin for standard occupancy and Vmax (boost) for high occupancy level.

Combined with the STRA-24 room controller, different modes are offered : OFF, Standby, unoccupied, occupied and boost. For each modes, different sequences between water and air are possible: cooling without free cooling, cooling with free cooling and airflow depending on CO_2.

The Pi function keeps airflow at set point value despite pressure fluctuations in the duct. The Pi Function is easy to retrofit and applicable to any ductwork system owing to its pressure independent functionality.

Note when using Pi Function, induction is always symmetrical and a room controller is required to operate Pi Function with link to occupancy sensor. Duct pressure has to be maintained between 40 and 140 Pa.

Figure 1: Pi Function actuator



CONSTRUCTION AND FUNCTIONS

HEATING FUNCTION WITH PI

Naturally, warm air rises and remains at ceiling level when the heating function of a chilled beam is used and can therefore result in an unbalanced temperature gradient within the room. However, using a chilled beam with PI-function means that you can create stable ventilation whilst in heating mode. This is achieved by increasing the airflow when the demand for heating grows along with the level of occupancy inside the room. When there is an demand for more heating the airflow is increased causing it collide with walls or other airstreams in the room and is then directed downwards to the occupied zone. The level of increased airflow in heating mode is an adjustable parameter in STRA-24 (parameter 49).

CAUTION! If Pi Function is installed as a retrofit, there is no need for a damper before the chilled beam. Any previously installed damper, should be set to fully open position or removed.

FLOW PATTERN CONTROL (FPC)

The FPC (Flow Pattern Control) function provides high flexibility. The combination of Flow Pattern Control (FPC) and the patented Comfort Control gives unique characteristics to this chilled beam.

FläktGroup FPC air deflector enables easy adjustment of the air direction simply by repositioning the plastic blades as shown in illustration to the right.

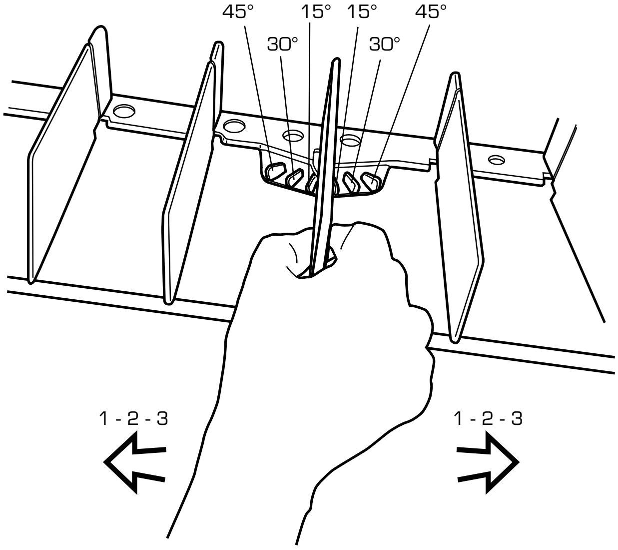


Illustration below shows FPC blades set at opposing 30° angle settings and with comfort control in symmetrical setting.

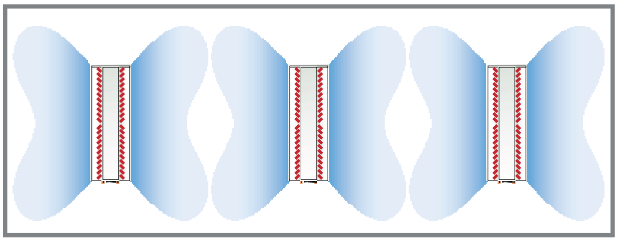
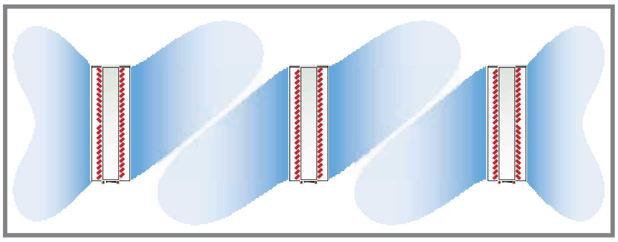


For high airflow applications as illustrated below, comfort control is in symmetrical setting, while FPC blades set at 30° angle settings on opposing units to avoid colliding air streams.



INSTRUCTIONS

For installation, maintenance and commissioning instructions, please refer to specific manuals available on the Internet at www.flaktgroup.com.

TECHNICAL AND SOUND DATA

CONDITIONS FOR COOLING PERFORMANCE TABLES

Total cooling effect of beam, P_{tot} = cooling effect of coil, P_{coil} + cooling effect of supply air, P_{air}.

- Air side total pressure drop of 70 Pa.
- Water flow rate of 0.05 l/s per circuit.
- Δt = 8° C between room temperature and mean water temperature.
- Δt = 8° C between room temperature and supply air temperature.

Performance for water flows other than 0.05 l/s can be found in the Fläkt Group product selection tool, SELECT (select.flaktgroup.com).

The tables here are based on tests done according to the EN 15116 standard. The purpose of this standard is to be able to compare performances of different chilled beams on the same terms. The external heat supply method has been used where heating has been supplied evenly over the floors and walls such that the on-coil temperature is the same as the temperature at 1.1 m above floor level (seated head height).

In actual conditions, the temperature difference is normally 1° C. This is why the temperature Δt should be increased by 1° C to avoid over dimensioning of the beam.

This means that the table value concerned can be increased by 10 %. As such it is not uncommon for selections in SELECT to have 1° C increase between ceiling temperature and room temperature.

DEFINITIONS

q_l	Supply airflow, l/s
P_{tot}	Total cooling effect, W
P_{coil}	Cooling effect of the coil, W
$P_{coil\ heat}$	Heating effect of the coil, W
Δt	Difference between room air temperature and average water temperature, °C
Δp_W	Pressure drop water,, kPa
Δt_W	(°C) = P_{coil} (W) / 208
Δt_W	(US imperial) - Δt_W (°F) = P_{coil} (BTU/tim) / 81177
L_{A10}	Sound pressure level in a room with 10 m² room absorption, dB(A)

SOUND POWER LEVEL

NOVA II	Correction K dB |Octave band, middle frequency, Hz							
	63	125	250	500	1000	2000	4000	8000
120	4	3	4	3	0	−8	−17	−18
150	4	3	4	3	0	−8	−17	−18
180	4	3	4	3	0	−8	−17	−18
210	4	3	4	3	0	−8	−17	−18
240	4	3	4	3	0	−8	−17	−18
270	4	3	4	3	0	−8	−17	−18
300	4	3	4	3	0	−8	−17	−18
330	4	3	4	3	0	−8	−17	−18
Tol ±	4	2	2	1	1	2	3	8

The sound power levels for every octave band are obtained by adding together the sound pressure level L_{A10} , dB(A), and the corrections K_{oct} given in the table above, according to the following formula:

$$L_W = L_{A10} + K_{oct}$$

Correction K_{oct} is the average in the area of application of the chilled beam.

SOUND ATTENUATION

The average sound attenuation ΔL of the chilled beam from duct to room includes the end reflection of the connecting duct.

Sound attenuation in supply air duct of the beam ΔL, dB Octave band, middle frequency, Hz

ACCESSORIES

FASTENING BRACKET QFAZ-18

A suspension bracket facilitates the suspension of chilled beams from the ceiling. Two brackets are used for each beam. The brackets can be ordered in advance or along with the chilled beam. The suspension brackets can be fitted directly to the ceiling or onto channel support bars. The chilled beam is simply attached by pressing it against the bracket until it clicks into place. No tools are needed. After this, the chilled beam can be adjusted lengthwise by sliding the bracket along the beam's fastening points. To adjust it sideways, slide the threaded bars along the grooves in the bracket.

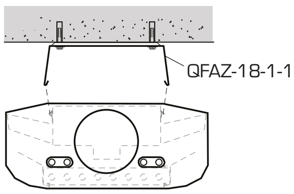

Figure 2: QFAZ-18

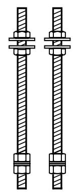
If there is a need for adjusting the installation height, suspension brackets and suspension rods M8 (QFAZ-12) can be ordered as well.



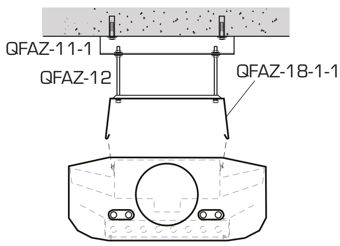


Figure 3: QFAZ-12

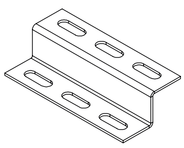

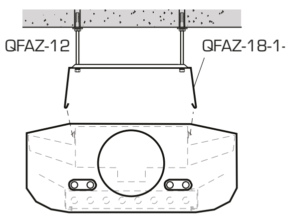

Figure 4: Suspension bracket QFAZ-11

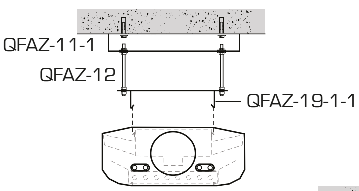
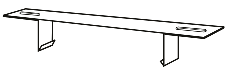
INSTALLATION WITH FASTENING BRACKET QFAZ-19

Low-build fastening bracket (QFAZ-19) is available for installation where there is a limited height to install the chilled beam.





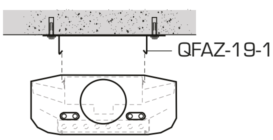


Figure 5: QFAZ-19-1-1

For more information regarding the installation procedures, please see the installation manual for this chilled beam.

DUCT ENCLOSURE

Duct enclosure (IQAZ-30) is available in three size ranges for concealing water pipes and air ducts:

- 30 to 50 cm
- 50 to 90 cm
- 90 to 170 cm

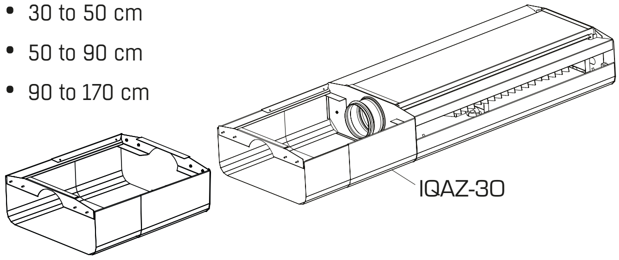

Figure 6 IQAZ-30

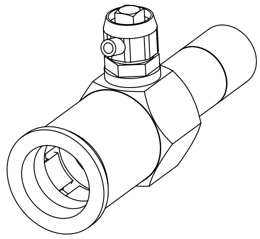
PURGING NIPPLE

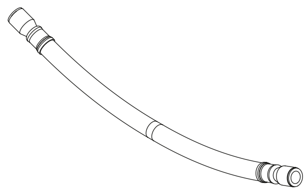
Purging nipple is available on demand and can be selected in product code.

FLEXIBLE HOSES

Flexible hoses are available with push-on connection for easy installation.



Purging nipple



IQAZ-19 flexible hose with push-on connection.

NOZZLE ACTUATOR FOR PI FUNCTION

This chilled beam can be ordered with pressure independent airflow control function which requires installation of IQAZ-35 nozzle actuator. The actuator comes with Modbus communication and can be supplied loose for post installation.

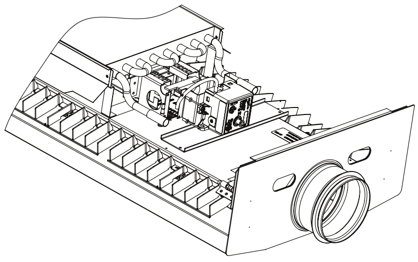


Figure 7: IQAZ-35

For more information regarding the installation procedures, please see the installation manual for this chilled beam.

ROOM CONTROLLER STRA-24

STRA-24 is a pre-programmed room controller intended to control the temperature and the CO_2 level in rooms. It manages the water coil actuator and the actuator of the Pi function. It is pre-programmed with communication and is intended for use in premises with high comfort and low energy demands.
The STRA-24 is able to optimise energy consumption in rooms depending on different parameters: occupancy, CO_2 level, outside conditions (free cooling feature) and timetable.
Different modes are offered : OFF, Standby, occupied and boost. For each modes, different sequences between water and air are possible : cooling without free cooling, cooling with free cooling and airflow depending on CO_2.
For more information regarding this product and related accessories, please see the STRA-24 technical catalogue.

Figure 12: STRA-24 Room Controller

VALVES AND ACTUATORS

To see full description and technical data for valve kit, please see the STRA Accessories catalouge.

Figure 13: STRZ-70

INTEGRATED CONTROL

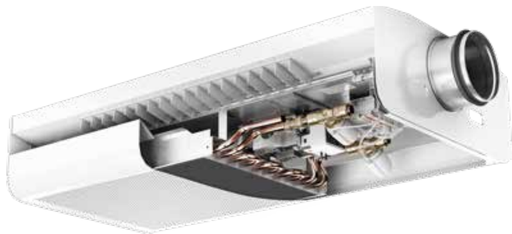
NOVA II is available with integrated control by ordering the accessory STRZ-76. The room controller can be positioned in three different locations depending on the desired level of accessibility.

Actuators and valves are fixed on NOVA II in factory. A very simple operation allows the installer to connect it with no risk of leakage. The valves, optional condensate sensor and optional PIR (presence detector) are factory wired to a terminal block which is mounted behind the front plate of the unit. The PIR is mounted and integrated in the front plate. If the Pi-actuator (IQAZ-35) is chosen it will also be wired to the terminal block.

The integrated control offers Modbus or Bacnet communication as standard and it a llows you to connect directly to the IPSUM system without using the IPSUM Connection unit.

From the room controller, it is possible to make the commissioning, increase and decrease temperature and display main information. For more information regarding this product and related accessories, please see the **STRA-24 technical catalogue and STRA Accessories catalouge**.

SLAVE

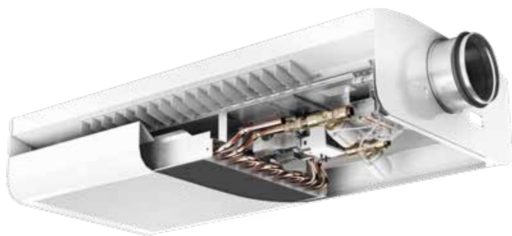


For parallel control. On site the installer needs to connect the room controller from the master beam to the terminal block placed on top of the NOVA II.

Code:	STRZ-76-00-cc-1-ee
Connection Socket:	YES
Cooling/Heating:	Cooling, Cooling & Heating[1)]
External temperature sensor included:	NO

1) If the chilled beam have cooling & heating, the actuators and valves are placed on the outside of the beam.

CONTROLLER SUPPLIED LOOSE



The room controller is supplied loose. On site the installer needs to connect the room controller to the terminal block placed behind the front plate of the NOVA II. This configuration uses the integrated temperature sensor in the room controller.

Condensation sensor (in option) is factory wired.

Code:	STRZ-76-01-cc-1-ee
Connection Socket:	YES
Cooling/Heating:	Cooling, Cooling & Heating[1)]
External temperature sensor included:	NO

1) If the chilled beam have cooling & heating, the actuators and valves are placed on the outside of the beam.

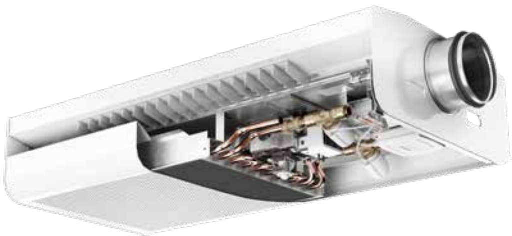
MOUNTED ON TOP OF THE FRONT PLATE

The room controller is factory mounted and wired on top of the front plate of NOVA II hidden from sight. In this configuration, the temperature sensor built into the room control tower is used. Temperature and condensation (in option) sensor are factory wired.

Code:	STRZ-76-02-cc-1-ee
Connection Socket:	YES
Cooling/Heating:	Cooling[1)]
External temperature sensor included:	NO

[1)] The heat of the chilled beam required external temperature sensor on the wall ordered separately.

CONTROLLER INTEGRATED IN FRONT PLATE



TThe room controller is integrated in the front plate of NOVA II and wired. This configuration uses the temperature sensor built into the room controller. Condensation sensor (in option) is factory wired.

Code:	STRZ-76-03-cc-1-ee
Connection Socket:	YES
Cooling/Heating:	Cooling[1)]
External temperature sensor included:	NO

[1)] The heat of the chilled beam required external temperature sensor on the wall ordered separately.

LIGHTING

In certain cases, there is a requirement to provide the chilled beam with lighting function. Ceiling space is made available in this way, and a number of functions are combined in the same chilled beam. The installation costs can be reduced in this way, because fewer products need to be installed.

Nova can be equipped with direct lighting. With direct lighting there is a requirement both for a given intensity of illumination, for example on a work surface, and for the air from the beam to ventilate the occupied zone effectively without creating draught problems. It is necessary in this case to find the right positioning of the beam to be able to guarantee the right intensity of illumination and good ventilation comfort.

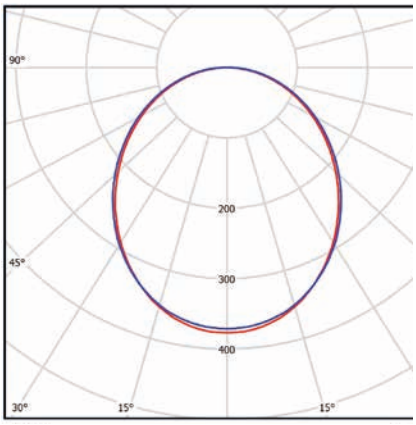
The lighting function is offered to the rectangular shaped version of NOVA (bb = 11 and 13).

PRODUCT FACTS

- LED is used as a light source
- The connection cable can be supplied with a plug, loose ends, Wieland
- DALI ballast can be selected, then the connection cable with loose ends
- There are 2 different executions for LED:
  - -Notor Recessed LED Opal flush
  - -Notor Recessed LED Opal dropped

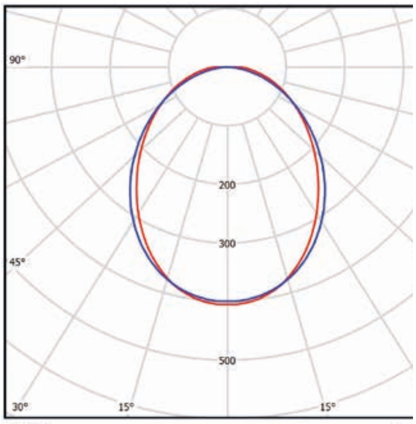
NOTOR RECESSED LED OPAL FLUSH

With length 1200: Light output (Lamp) 1798 lm, Light output (Light source) 1798 lm



NOTOR RECESSED LED OPAL DROPPED

With length 1200: Light output (Lamp) 1855 lm, Light output (Light source) 1855 lm



DIMENSIONS LIGHTING

DIMENSIONS LED

Beam lengths aaa (cm)	**120**	**150**	**180**	**210**	**240**	**270**	**300**	**330**

Beam lengths - aaa (cm)	**120**	**150**	**180**	**210**	**240**	**270**	**300**	**330**
L = Length of light fittings LED	589	1174	1174	1174	1474	1474	1174	1174
Number of light fittings	2	2	2	2	2	2	4	4

PRODUCT AND ACCESSORIES CODES

PRODUCT CODE

NOVA II chilled beam **IQFI-aaa-bb-cc-d**

Length (aaa) (cm)
120, 150, 180, 210, 240, 270, 300, 330

Construction (bb)
11 = Rectangular shape, air, water horizontally through gable
13 = Rectangular shape, extended casing (300 mm), (only aaa = 120 - 300)
21 = Rounded shape, air, water horizontally through gable
23 = Rounded shape, extended casing (300 mm), (only aaa = 120 - 300)

Coil construction (cc)
03 = Cooling 8 tubes
04 = Cooling 8 tubes with purging nipple
07 = Cooling 10 tubes
08 = Cooling 10 tubes with purging nipple
09 = Cooling\Heating - 8\2 tubes
10 = Cooling\Heating - 8\2 tubes with purging nipple

Coil option for aaa = 270, 300 and 330
13 = Parallel flow cooling 10 tubes
14 = Parallel flow cooling 10 tubes with purging nipple

Comfort Control (d)
1 = Without FPC
2 = With FPC

ACCESSORY CODES

Pi Function actuator **IQAZ-35-02-c-1-e**

Cable execution (c)
1 = Cabel 1m without contact
2 = Cabel 80mm with RJ45-contact (female) for use with IPSUM Connection unit and is not compatible in combination with STRZ-76[1)]

Installation (e)
1 = Installed on chilled beam
2 = Supplied loose

[1)] Please note that RJ45-contact has a extended delivery time

Pre-set Pi actuator **IQAZ-36-bbb-cccccc**

k100% (bbb)
247 = IQFI-120
355 = IQFI-150
455 = IQFI-180
550 = IQFI-210
670 = IQFI-240
765 = IQFI-270
850 = IQFI-300
955 = IQFI-330

Airflow V0, Vmin, Vmaxin l/s (cccccc)[2)]
cc---- = V_0
--cc-- = V_{min}
----cc = V_{max}

[2)] Ordering example below

Eg: IQAZ-36-355-020420

- k100% = 3.54
- V_0 = 2 l/s
- V_{min} = 4 l/s
- V_{max} = 20 l/s

Actuator and valve Siemens **STRZ-70-bb-cc-0-1**

Valve (bb)
00 = Without
01 = DN15 (kvs 0.25-1.9) female 1/2" valve inlet
02 = DN20 (kvs 0.25-2.6) female 3/4" valve inlet
03 = DN25 (kvs 0.25-2.6) female 1" valve inlet
11 = DN15 (kvs 0.25-1.9) Compression ring valve inlet
21 = DN15 (kvs 0.25-1.9) Push on valve inlet
41 = DN15 Pressure independent (100-575 l/h) female 1/2" valve inlet
42 = DN20 Pressure independent (220-1330 l/h) female 3/4" valve inlet
43 = DN25 Pressure independent (280-1800 l/h) female 1" valve inlet
51 = DN15 Pressure independent (100-575 l/h) Compression ring valve inlet
61 = DN15 Pressure independent (100-575 l/h) Push on valve inlet

Valve actuator(cc)
00 = Without
01 = 24 V NC cable 1 m
11 = 24 V NO cablel 1 m
21 = 230 V NC cable 1 m
31 = 230 V NO cable 1 m

Integrated controls **STRZ-76-bb-cc-1-05**
Only for IQFI, product code bb = 11 and 21

Placement of controller (bb)
00 = Without room controller (slave)
01 = Supplied loose
02 = Mounted behind front plate
03 = Integrated in front plate

Sensors and valve kit (valve and actuator) (cc)
00=without sensor, valve and actuators cooling
01 = Cooling valvekit
02 = Cooling valvekit, condensate sensor
03 = Cooling valvekit, PIR
04 = Cooling valvekit, condensate sensor, PIR

Options only for bb = 00 and 01
05 = Cooling and heating valvekit
06 = Cooling and heating valvekit, condensate sensor
07 = Cooling and heating valvekit, PIR
08 = Cooling and heating valvekit, condensate sensor, PIR
09 = without sensor, valve and actuators cooling/heating

Fastening brackets **QFAZ-18-1-2**
Set with 2 pieces, 1 set per beam

2 = Painted RAL 9003 gloss 30% (NCS 0500-N)

Fastening brackets (low-build) **QFAZ-19-1-1**
Set with 2 pieces, unpainted, 1 set per beam

Suspension rods M8 **QFAZ-12**
Set with 2 pieces. Length 500 mm, 2 sets per beam

Suspension bracket **QFAZ-11-1**
Set with 2 pieces, unpainted, 1 set per beam

Flexible hose **IQAZ-19-550-010010**
Length = 550 mm

Bend 90° **BDEB-90-012**
Supplied loose

Duct enclosure **IQAZ-30-bbb-c**

Length (bbb)
050 = 30 - 50 cm
090 = 50 - 90 cm
170 = 90 - 170 cm

Design (cc)
1 = Rectangular shape
2 = Rounded shape

Lighting **IQAZ-31-bbb-cc-d-1**

Length (bbb) (cm)
bb = 11 in chilled beam code = aaa[3)]
bb = 13 in chilled beam code = aaa + 30 cm

Execution (cc)
05 = Downlight Opal flush, LED
06 = Downlight Opal dropped, LED

Connection cable (d)
0 = without
1 = Length 2 m loose wire connection
2 = Length 2 m plug connection
3 = Length 2 m male Wieland
4 = Length 2 m male 5-pin connector for DALI

3) **aaa** and **bb** refer to beam length and construction, respectively. Please see Product code section.

ORDER EXAMPLE

ORDER EXAMPLE

Here is an example to demonstrate an order complete with typical accessories. For more information about orders or specific requirements for special units, please contact your nearest FläktGroup sales office.

An order example for a room with 5 chilled beams. The beams are calculated as 270 cm length for required airflow and cooling capacity in product selection tool SELECT (http://select.flaktgroup.com).

CHILLED BEAMS

Product codes	Description	Quantity
IQFI-270-11-10-2	NOVA II chilled beam, water cooling and heating with purging nipple,with FPC, for exposed installation	5
QFAZ-18-6-1	Fastning bracket, set of 2 for installation	5

OPTION FOR DEMAND CONTROLLED VENTILATION

Product codes	Description	Quantity
IQAZ-35-02-1-1-1	Pi Function, Nozzle actuator, 1 piece per chilled beam	5

CONTROLS

Product codes[1)]	Description	Quantity
STRA-24-00-0-00	Room Controller	1
STRZ-05-02	External temperature sensor	1
STRZ-16-1	Condensation sensor	1
STRZ-24-1	Transformer[1)]	1

CONTROLS OPTIONS FOR DEMAND CONTROLLED VENTILATION

Product codes[1)]	Description	Quantity
STRZ-09-2	Occupancy detector (for single office application)	1
STRZ-18-1-2	CO_2 sensor (for meeting room)	1

VALVES, ACTUATORS AND FLEXIBLE HOSES

Product codes[1)]	Description	Quantity
STRZ-70-11-01-0-1[1)]	Valve + valve actuator	10
IQAZ-19-550-010010	Flexible hose push-on	10

DUCT ENCLOSURE AND LIGHTING

Product codes	Description	Quantity
IQAZ-30-170-1	Rectangular duct enclosure, length 90 - 170 cm	5
IQAZ-31-270-06-1	Integrated lighting (LED), 2 fittings per beam, Length 1174 mm, with 2 m loose wire	5

[1)] For more information, please see the STRA-24 technical manual and STRA Accessories catalogue.

PCT.312 DUCTED SPACE COOLING APPLIANCES

The FläktGroup´s NOVA II chilled beam for integrated installation in suspended ceilings, has the following requirements/functions: (the size, variant etc., are indicated in the product code).

- Eurovent certified.
- Cooling, ventilation or Cooling, water heating, ventilation or Cooling, electric heating, ventilation.
- Pi motorised continuously variable VAV function, including an unoccupied flow mode

  or EC for the simple continuously variable adjustment of air flows, and the potential for installing a VAV (Pi) motor at a later stage.
- Heating function in which heating is delivered by the water coil, and circulation in the space is controlled by the VAV function (Pi).
- X-flow high flow variant designed for conference rooms, with a capacity of up to 100 l/s.
- FPC (flow pattern control).
- Extended casing; see the order code, for easier access to the motor, actuator etc., (also recommended for installation in acoustic ceiling systems).
- "Click-in" mounting brackets for easier installation.
- RAL 9003 gloss value 30.
- Factory fitted controls. All electrical components are connected to terminal blocks for the straightforward connection of a 24 V power supply. Water actuator with valves with compression fittings.
- Controller integrated into the front panel.

  or Controller mounted on the side above the suspended ceiling (concealed from the room).

  or Supplied separately for fitting in an optional location.
- Variant according to the order code for NOVA II (IQII).
- Accessories as specified.
- STRA-XX controls as specified.

EXCELLENCE IN SOLUTIONS

FläktGroup is the European market leader for smart and energy efficient Indoor Air and Critical Air solutions to support every application area. We offer our customers innovative technologies, high quality and outstanding performance supported by more than a century of accumulated industry experience. The widest product range in the market, and strong market presence in 65 countries worldwide, guarantee that we are always by your side, ready to deliver Excellence in Solutions.

PRODUCT FUNCTIONS BY FLÄKTGROUP

Air Treatment | Air Movement | Air Diffusion | Air Distribution | Air Filtration
Air Management & ATD's | Air Conditioning & Heating | Controls | Service
